

REWIRED PITCHFEST

Pitchfest live finals @ Rewired24

Watch 16 of the hottest digital health start-ups and scale-ups pitch their innovations in front of a live audience across two pre-revenue and revenue generating categories. Following a series of virtual heats, the finalists will battle it out to win the opportunity to work with Chelsea and Westminster NHS FT's innovation team to scale their solution across the NHS..

Kidney Beam

Kidney Beam is a health-tech company with the technological and scientific expertise to transform exercise and lifestyle management care for people with kidney disease.

Medwise AI

Medwise.ai is a search engine for instant answers to clinical queries and uses extractive AI to provide concise and actionable answers clinicians need at the point of care.

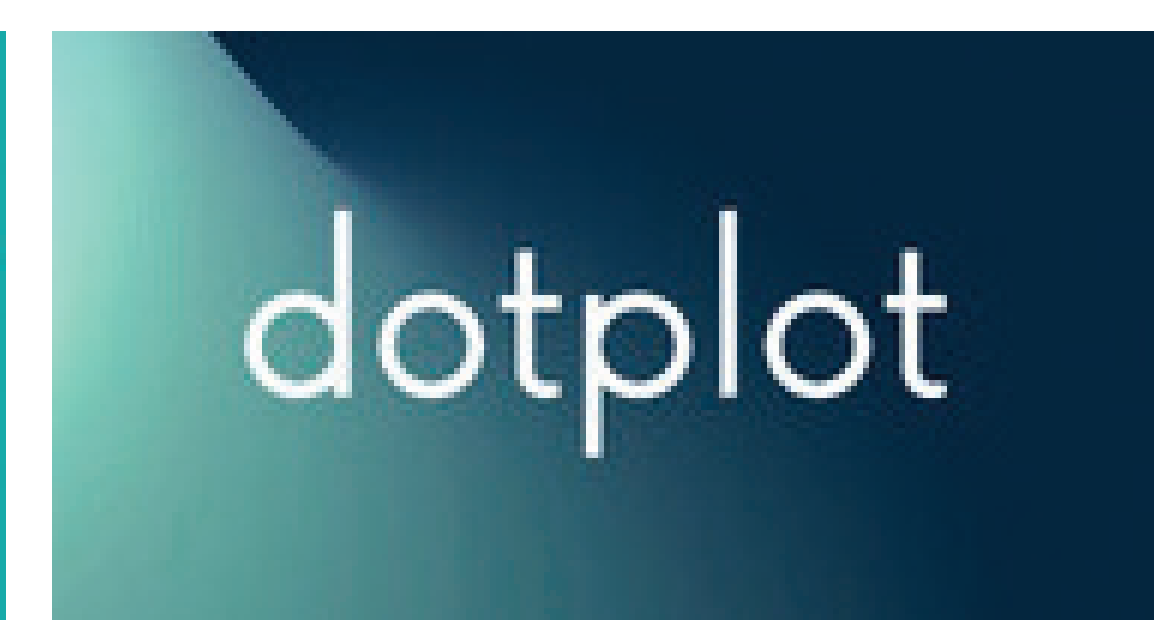

Bulbitech AS

Bulbitech revolutionises neuro diagnostics by assessing brain function with eye tracking.

Upfront Diagnostics

Upfront Diagnostics discovers novel biomarkers that can help patients to receive treatment earlier.

Dotplot

Dotplot offers visual summaries of variations in breast tissues by creating a 3D model of the patient's own anterior chest.

PIPRA AG

PIPRA AG is at the forefront of developing revolutionary products that harness the power of A.I. and high-grade patient data for the prevention, prediction, and diagnosis of delirium.

Goggleminds

Goggleminds® has created a VR cloud-based training platform that gives healthcare professionals and students access to on-demand and immersive simulation training.

Healthy.io

Minuteful for Wound is a CE certified digital wound management solution that provides the platform to digitally enable whole scale wound care transformation.

Bingli

Bingli is a disease agnostic solution that asks the right questions in advance using the most accurate AI. Patients can answer at their own pace, in their own language.

Luna

luna is a mobile wellbeing app which provides teenagers with educational content and a safe space to ask anonymous questions and get an expert backed response.

MediTask

Meditask is a mobile application that connects clinicians and medical students to transform workflow distribution and medical education.

Aspedan

Aspedan is a digital health startup with a vision to help people maximise their healthy lifespan and reduce the incidence of chronic diseases through an ergonomic smartphone app.
