

DIGITAL TRANSFORMATION	INTEGRATED CARE	AI	DATA & DIGITAL	CYBER & INFRASTRUCTURE
Morning keynote: 10 year health plan practicalities	Panel discussion: How to integrate health and social care	Early adventures in ambient scribing	Keynote: Professor Ben Goldacre	Addressing the risks posed by interoperability
Realising the potential of the NHS App	Morning keynote: Welcome to the neighbourhood	An introduction to making AI work in practice: practicalities, pitfalls, and ethical considerations	Creating a robust secure data environment	Cyber keynote session: Emerging AI and quantum computing cyber threats
The possibilities and realities of the Single Patient Record	Addressing the challenges with shared care records	The transformation of surgery with AI and robotics	Personalised and genomics care early lessons	Providing the infrastructure for neighbourhoods
Afternoon keynote: Digital transformation across Dorset	Designing digital maternity services for the future	Afternoon keynote: AI in practice and leading at a local level	Digital innovations case study session	Debate: How can cyber power the 10 year health plan?
Spotlight session	Spotlight session	The AI elephant in the room: risk and responsibility	Implementation of Federated Data Platform (FDP) at scale	The future infrastructure for the NHS
Digital shift to community services at scale	Virtual care at scale and NHS online	AI big debate: Asking the big questions around the opportunities and threats of AI	The use of digital in prevention and early intervention	Cyber associates networks and training

DIGITAL LEADERSHIP	PATIENT ENGAGEMENT	DIGITAL FRONTLINE	EPR IMPLEMENTATION & OPTIMISATION	BEST PRACTICE SHOWCASE
Exploring what needs to change digitally to transform health and care	Keynote session: Patient engagement in action	Real-world collaborative approaches including multidisciplinary voices	Lessons learnt from EPR implementation with multidisciplinary teams	Clinical software innovations
Keynote: Ensuring analogue to digital with the Digital Health Networks	Single Patient Record: Why it must focus first on the patient	Discover the UK's first AI assistant robot in hospital	Combining genomics into patient records	Leveraging technology to improve productivity
Creating a culture of digital clinical safety	Patient panel: How to improve digital health services	Maternity's shift to digital to ensure continuity of care	Effectively implementing EPRs at speed	Opportunities with the AI revolution
Spotlight session: Leading change	Virtual wards come of age	Achieving community-based delivery in the NHS	Defining your EPR goals to measure benefits and prove ROI	Results from the latest reporting and communication tools
Leadership in action: from handwaving to active ally	Panel discussion: Explore the opportunities of digitally enabled personalised care	Best practice case studies	Optimising EPR benefits through digital leadership	The latest innovations advancing digital in health and care
Panel discussion: Building high impact teams				

DIGITAL TRANSFORMATION	INTEGRATED CARE	AI	DATA & DIGITAL	CYBER & INFRASTRUCTURE
Is the NHS getting better? Latest DMA data and trends	Morning keynote: Ambitions for the future of integrated care	Speeding up and scaling clinical trials	Driving digital and policy change in the NHS through new research	Cyber security: It's still all about your people
Morning keynote: Driving the policies to make tangible change	How digital is will improving health outcomes by integrating mental health services	Implementing AI tools post-acquisition: what to do next	Exploring the current applications of digital twins in healthcare	Going global to help shape our own smart hospitals: New hospital programme and international partners
Solving the EPR productivity paradox	Building on existing shared care foundations	Advancements for diagnostics using AI	Market trends and insights: Future Health Intelligence	Lessons learnt from cyber threats and attacks
Spotlight session	Afternoon keynote: Integrating acute, mental health, social care and primary care in Northern Ireland	Does the AI revolution solve the admin burden for the NHS workforce?	NHS Innovation Accelerator (NIA) Launch Event Presentations from the 2026 NIA Fellows with an interactive panel discussion on the adoption and spread of innovation across healthcare	Infrastructure for distributed patient-centred care
Closing panel discussion: What are the next steps to deliver the 10 year health plan?	Digitally enabling the shift from treatment to prevention	AI innovations and case studies		Panel discussion: What infrastructure and protections will the NHS of the future need?

REWIRED

24-25 MARCH 2026

The NEC, Birmingham | Wednesday 25 March 2026

DIGITAL LEADERSHIP	PATIENT ENGAGEMENT	DIGITAL FRONTLINE	EPR IMPLEMENTATION & OPTIMISATION	BEST PRACTICE SHOWCASE
Strategies and approaches for engaging with CFOs and CEOs	Building the bigger, better, bolder NHS App	Panel discussion: What do the 'neighbourhood' look like for frontline staff?	Deep dive into the lessons learnt from implementation	Improving the quality of care through NHS App innovations
Keynote: Digital nursing leadership	Patient innovators: Improving patient care, access, and outcomes	What does the three shifts mean for frontline staff?	EPR optimisation case studies	Insights from international best practice
Panel discussion: Gen Z digital leaders making an impact now	Where are we on wearables as medical devices?	Practical guidance on implementing digital in clinical settings	Digital initiatives in maternity care	The future of healthcare through imaging
Spotlight session: Procurement lessons from digital leaders	Panel discussion: AI, apps and wearables for behavioural health	How to scale the use of technology to "liberate staff and provide more time to care"	Using multiple EPRs to reduce data fragmentation and improve efficiency	Pitchfest Live final of the UK's most high-profile digital health start-up competition
AI training and skills for the workforce
